The Wilson Combat Difference

LEGACY

For over 40 years, Wilson Combat has been the leading innovator in high-performance, custom firearms and accessories. A Wilson Combat product's unmatched level of exceptional reliability and peerless craftsmanship is only equaled by our best-in-class customer service.

.308 SUPER SNIPER

AR–15

Since 1999 we have been building custom AR rifles with guaranteed reliability and accuracy from the best parts available. Our Wilson Combat Custom AR barrels are all machined in-house from our match-grade domestic blanks so we can guarantee sub 1" performance.

Our exclusive billet receivers are produced on CNC machines to tight tolerances in house by our skilled machinists. Most major small parts like gas blocks, muzzle devices, scope mounts and more are produced in house by our CNC machinists to ensure quality control. Major assemblies like bolt carrier groups are sourced from the best Mil-Spec contractors. All AR rifles are completed in our shop by our extensively trained finishers.

Finally, all Wilson Combat AR rifles are targeted for sub 1" accuracy and guaranteed reliability. Every rifle comes with a signed test target and a padded range case.

AR9G

Our new AR9 stands alone in the 9mm AR market for match-grade accuracy and the ability to use common service pistol magazines from Glock, S&W or Beretta. This in-house engineered 9mm AR carbine has raised the bar for 9mm carbine performance.

We offer the widest selection of rifle calibers to suit your needs. From precision shooting to hunting, Wilson Combat has an AR rifle for you. We build a wide array of high quality AR parts and accessories from barrels, receivers, handguards, trigger units and more. By controlling the design and manufacture of these products we can build a more consistent, reliable product for you.

SMALL PARTS

Wilson Combat is a leader in custom 1911 small parts. The Bullet Proof® line of parts is well known worldwide for enhanced performance and function over standard 1911 parts. Wilson Combat offers a wide variety of small parts, springs, grips and other 1911 accessories to suit any budget.

SCATTERGUNS

Wilson Combat Scatterguns are the choice of federal agencies, police departments and other professionals who use shotguns as defensive tools. We manufacture a full suite of shotgun products and accessories, and can build a fine tactical shotgun to your specifications. From machined ghost ring sights to magazine tubes, we have a quality shotgun parts solution for you.

MAGAZINES

Bill Wilson knows that the heart of any 1911 pistol is the magazine. Through his extensive experience as a gunsmith and champion shooter he realized the need for a magazine that feeds reliably, is easy to maintain, and holds up to many years of heavy use. The Wilson Combat 47 series is the result, and almost 30 years after its creation it still stands as the top choice of military, law enforcement, and competitive shooters.

Wilson Combat's magazines, like our firearms, have been upgraded continually over the years to take advantage of new advances in technology and design, and our magazines meet the needs of any shooter. Our Elite Tactical Magazines in .45 ACP and 9mm are the latest generation of these experience-driven enhancements.

AMMUNITION

Wilson Combat produces a full line of custom quality handgun and rifle ammunition for sport and defense to support our products and the needs of demanding shooters. Our custom ammunition has been thoroughly evaluated for unsurpassed feed reliability, match-grade accuracy, and low flash. Our "Pinnacle" line of defensive ammunition can be relied on for superior terminal performance.

First Class 1911 Craftsmanship

HISTORY

We have over 40 years experience as champion competitors, gunsmiths, parts manufacturers and industry-leading experts on the use and application of the 1911 handgun. Our founder Bill Wilson has guided Wilson Combat from a small, one-man gunsmithing operation to the International leader in custom handgun development and production. Wilson Combat has one driving goal– overall quality from manufacturing to customer service after the sale. Our well-equipped, modern facility in Berryville AR contains CNC machining, gunsmithing, test fire, and finishing all at one location to ensure that we maintain this sharp focus on excellence.

CONSTRUCTION

All 1911 handguns are 100% BulletProof® construction—with all parts CNC precision-machined from bar stock or forgings—a Wilson Combat industry first. Unlike our competitors, our custom pistols are always evolving to take advantage of the latest advancements in firearm technology and design. We only use 100% American-produced components in our custom firearms, and refuse to use imported MIM or cast parts in our 1911's.

GUNSMITHS

Wilson Combat Custom 1911 handguns are built to order by a team of specialist gunsmiths who collaborate on each part of the build process to ensure rigid quality control. Our gunsmiths are among the most experienced in the industry; many have over 25-years of service hand-building custom pistols. Almost 40 years of experience has shown us that this proven, team-building philosophy builds more consistent, higher quality custom guns than a single gunsmith approach. This is the same philosophy used by European, ultra-high-grade, bespoke custom gunmakers for centuries.

FINAL FINISH

After final fitting, all Wilson Combat Custom 1911 handguns are completed in our shop by our final finishing department to ensure that appearance and finish quality is even, free of blemishes and is as cosmetically perfect as possible.

SHIPPING

All Wilson Combat Custom 1911's ship with a high-quality padded range bag, 2 Wilson Combat magazines, support materials, signed QC checklist, test target and a free annual membership to the NRA. Another Wilson Combat exclusive.

QUALITY

All Wilson Combat custom 1911 handguns go through a rigorous quality control checklist and extensive test-fire and targeting process. This process is done by professional shooters to guarantee that your pistol is properly adjusted, shoots reliably and accurately, and that the sights are regulated to point of aim– another Wilson Combat exclusive. It is not uncommon to fire up to 100 rounds or more per gun during the test fire and targeting process.

FOLLOW UP

After the sale, Wilson Combat has extensive educational materials available to support customers—almost 100 education product videos on our YouTube page **gowilsoncombat** and linked to **www.wilsoncombat.com** All 1911's get "Wilson Combat Supergrade Service" for life. Our team of seasoned customer service representatives is here to help you in every way possible via phone or email at **info@wilsoncombat.com**
